mondai  
House of AI

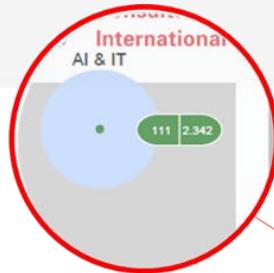

# 問題

*Mondai* is the Japanese word for **problem** or **question**

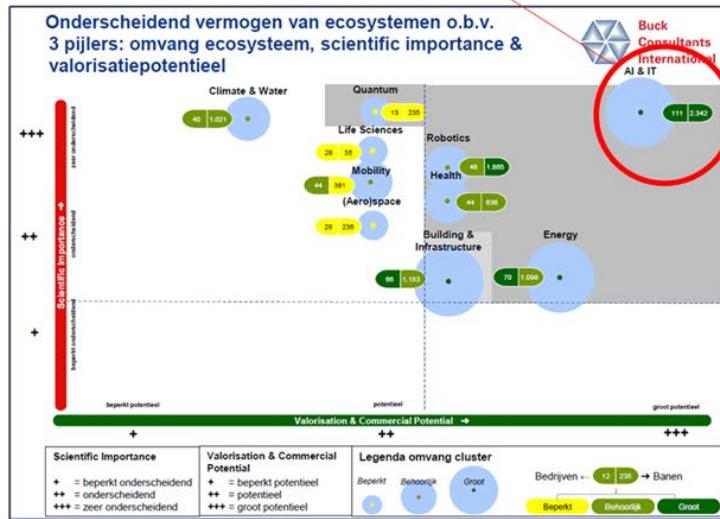

... and the brand name for the *House of AI* that the TU Delft has established to connect and enable all stakeholders in the development of artificial intelligence (AI).

To contribute to smart collaborations and partnerships, so that the ‘questions’ can be answered and the ‘problems’ solved. To enable innovations together, to facilitate entrepreneurship and to capitalize on economic and societal opportunities.

Connection, Collaboration, Entrepreneurship & Innovation

## *Distinctiveness of AI-ecosystem on TU Delft Campus*

### Findings in strategy & roadmap TU Delft Campus

(executed by Buck Consultants International – December 2022)

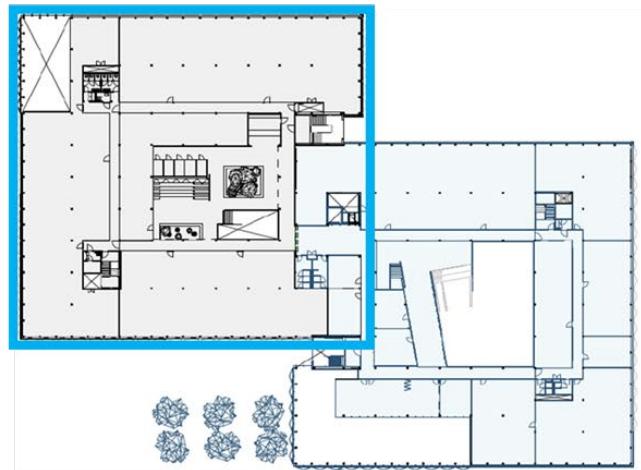

- AI & IT: scientific importance -> highly distinctive
- AI & IT: valorisation potential -> highly distinctive (highest of all topical ecosystems on campus)
- Recommendation: the potential of the AI & IT ecosystem is highest in combination with other ecosystems (cooperation with fieldlabs and innovation clusters)
- Recommendation: realise Mondai House of AI

(For more information: see attachments)

## Location

Fase 2 NEXT Delft

- Mondai House of AI – 1<sup>st</sup> Floor with Atrium
- Additional facilities & start-ups/scale-ups in AI, data & digitalization on 2<sup>nd</sup> and 3<sup>rd</sup> floor.
